

Answers:

1.

```
Dim wkbTute6 As Workbook
```

```
Set wkbTute6 = Application.Workbooks("Tute6.xlsm")
```

2.

```
Dim wksTute6 As Worksheet
```

```
Set wksTute6 = Application.Workbooks("Tute6.xlsm").Worksheets("Sheet2")
```

3.

```
Dim rngTute6 As Range
```

```
Set rngTute6 = Application.Workbooks("Tute6.xlsm").Worksheets("Sheet2").Range("A2")
```

4.

The first type of variable is representing the amount or number, like currency, which are Numeric Variables. The second type of variable is representing the
